

Terrarium Therapy is an online plant workshop experience that was created with one purpose: to grow your creativity and bury your stress. At Terrarium Therapy, we provide a refreshing and positive environment to connect and relax with others through nature.

At Terrarium Therapy, we understand the importance of team-building and keeping up employee morale, but know it may be a challenge for large parties to gather in one physical location at any given time. Fortunately, we are your solution! Terrarium Therapy offers virtual workshops for large corporate, non-profit, or fundraising organizations looking for a way to bring their employees or members together seamlessly. Our workshop packages include a fun and educational hour long experience that can be accessed from a computer or smartphone screen. We ship all project materials directly to each participant's doorstep and provide live virtual instruction while your team members get to sit back and enjoy creating something to cherish for years to come.

The Modern Planter Collection

"So Fresh and So Green, Green"
