

Terrarium Therapy is a plant workshop experience that was created with one purpose: to grow your creativity and bury your stress. At Terrarium Therapy, we provide a refreshing and positive environment to connect and relax with others through nature.

At Terrarium Therapy, we understand the importance of team-building and keeping up employee morale! We also know the significance of getting family and friends together to bond and make memories. Terrarium Therapy offers in-person workshops for corporate, non-profit, and fundraising organizations as well as groups of family and friends looking for a way to come together, enjoy nature, and de-stress. Our workshop packages include a fun and educational hour long experience that can be supplemented with wine tastings, beer flights, or restaurant courses depending on the location. We provide all needed materials to create the chosen planter and live instruction while your guests get to sit back and enjoy creating something to cherish for years to come.
